

TOHEED REHMAN

Full Stack Developer

☎ +92 3368894775 ✉ Toheedrehman775@gmail.com [in linkedin.com/in/Toheed Rehman](https://www.linkedin.com/in/ToheedRehman)

Summary

Full Stack Developer with hands-on experience building responsive web applications, RESTful APIs, AI-powered applications, and real-time systems. Skilled in React.js, Node.js, Express.js, MongoDB, Python, authentication, API integration, and cloud deployment. Experienced in developing complete applications from frontend interfaces and backend services to database integration and production deployment.

Technical Skills

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Redux

Backend: Node.js, Express.js, Python, FastAPI, Flask, REST APIs

Databases: MongoDB, MongoDB Atlas, PostgreSQL, SQL

AI & Machine Learning: TensorFlow, Keras, PyTorch, OpenCV, CNNs, Deep Learning, Computer Vision, Gemini API

Authentication & Real-Time: JWT, Firebase Authentication, Socket.IO

Tools & Deployment: Git, GitHub, Docker, Vercel, Cloudinary, VS Code

Experience

Web Developer

Oct 2025 – Nov 2025

ARCH TECHNOLOGIES – Remote

React.js, Next.js, Node.js, MongoDB, Tailwind CSS

- Developed responsive web applications using React.js, Node.js, HTML, CSS, and Tailwind CSS with a focus on usability and cross-device compatibility.
- Built RESTful APIs using Node.js and MongoDB to manage application data and integrate backend services with frontend dashboards.
- Developed reusable frontend components and optimized user interfaces to improve application performance and user experience.
- Collaborated with team members to translate business requirements into interactive web features and dashboard interfaces.

AI/ML Developer

Dec 2025 – Feb 2026

Code Alpha – Karachi, Pakistan (Remote)

Python, OpenCV, YOLO, Deep Learning, Google Colab

- Developed real-time object and face detection systems using Python, OpenCV, and YOLO for image, video, and webcam-based applications.
- Implemented multi-class object detection and localization with bounding boxes, confidence scores, and real-time detection capabilities.
- Developed face detection and recognition solutions using computer vision techniques and image processing workflows.
- Performed image and video preprocessing to prepare data for training, testing, and real-time deep learning inference.
- Used Google Colab and GPU-based environments for training, testing, and evaluating deep learning and computer vision models.

Projects

E-Commerce Website

2025

- Developed a responsive e-commerce web application with product browsing, search, shopping cart, authentication, and checkout functionality.
- Built RESTful APIs using Node.js and Express.js with MongoDB for product, user, and order management.
- Designed responsive interfaces using React.js and Tailwind CSS for desktop and mobile devices.
- Implemented form validation and integrated Stripe API for online payment processing.
- Configured MongoDB Atlas for cloud database hosting and deployed the application using Vercel.
- **Technologies:** React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Stripe API, REST APIs, Git, GitHub, Vercel

Skin Lesion Detection and Classification System

2025

- Developed an AI-powered skin lesion classification system using convolutional neural networks and the HAM10000 dermoscopic image dataset.
- Preprocessed dermoscopic images using OpenCV, including resizing, dataset preparation, and augmentation to improve model generalization.
- Implemented and evaluated deep learning models using TensorFlow/Keras and Python for multi-class skin lesion classification.
- Developed a web interface for uploading skin lesion images and displaying model predictions through a Python backend.
- Achieved a reported classification accuracy of 97.86% using the proposed CNN model on the HAM10000 dataset.
- Recognized as a Best Final Year Project and received an HEC award/cash prize.
- **Technologies:** Python, TensorFlow, Keras, CNN, OpenCV, Flask, React.js, HAM10000, Deep Learning, Computer Vision

- Developed a real-time messaging application using React.js, Node.js, Express.js, MongoDB, Firebase Authentication, and Socket.IO.
- Implemented Firebase-based authentication and synchronized user profiles and application data with MongoDB.
- Built one-to-one conversations with persistent messages, chat history, online/offline status, and message-seen functionality.
- Implemented image messaging and profile image uploads using cloud-based media storage.
- Created responsive chat interfaces with user lists, chat windows, profile management, and mobile-friendly navigation.
- Integrated Socket.IO for real-time communication and online presence between users.
- Configured MongoDB Atlas and deployed the application frontend and backend using Vercel.
- **Technologies:** React.js, Node.js, Express.js, MongoDB, Firebase Authentication, Socket.IO, REST APIs, Cloudinary, Git, GitHub, Vercel

TaskFlow – Task Management Web Application

Aug 2026

- Developed a full-stack task management application using React.js, Vite, Node.js, Express.js, MongoDB, and JWT authentication.
- Implemented authentication and protected routes to securely manage user-specific tasks and application data.
- Built a modern dashboard with task statistics, task cards, task creation/editing, and responsive sidebar navigation.
- Created RESTful backend APIs using Express.js and MongoDB for user and task management.
- Designed reusable React components including protected routes, application layout, navigation, statistics cards, task cards, and task modals.
- Deployed the application using Vercel and maintained the project with Git and GitHub.
- **Technologies:** React.js, Vite, JavaScript, Node.js, Express.js, MongoDB, JWT, REST APIs, Git, GitHub, Vercel

Nova – AI Chatbot Web Application

Aug 2026

- Developed a full-stack AI chatbot using React.js, Node.js, Express.js, MongoDB, and Google Gemini API for conversational interactions.
- Implemented user signup/login, JWT-based authentication, persistent sessions, and secure backend API access.
- Built persistent chat history with new chat creation and chat deletion using MongoDB.
- Designed a modern responsive chatbot interface with sidebar navigation, message bubbles, loading states, and authentication pages.
- Integrated the Google GenAI SDK to connect Gemini AI with the backend and generate contextual responses.
- Deployed the frontend and backend using Vercel with environment-based production configuration.
- **Technologies:** React.js, Node.js, Express.js, MongoDB, Gemini API, Google GenAI SDK, JWT, REST APIs, Git, GitHub, Vercel

Awards & Certifications

- **Best Final Year Project – 2025 (HEC Award):** Won a cash prize for “Classification and Detection of Skin Lesions Through Machine Learning Methods,” achieving 97.86% accuracy using a CNN model on the HAM10000 dataset.
- **Web Development Internship and Training Certificate – Arch Technologies (2025):** Completed an 8-week program focused on HTML, CSS, JavaScript, and React with practical web development experience.
- **Artificial Intelligence and Machine Learning Certificate:** Completed training covering fundamental artificial intelligence and machine learning techniques.

Education

BS Computer Science	2025
<i>Iqra University, Main Campus</i>	<i>CGPA: 3.09 / 4.00</i>
HSSC – Pre-Engineering	2020
<i>Govt. Shah Latif College, Kamber – BISE Larkana</i>	<i>948 / 1100 – A1 Grade</i>
SSC – Pre-Science	2018
<i>Govt. (P) High School, Kamber – BISE Larkana</i>	<i>626 / 850 – A Grade</i>
